Nonsuch High School for Girls

12 GCSE including English and Maths grades A – C, and Chinese grade A

RELEVANT WORK EXPERIENCE

Developer

Jellyfish (Paid search agency) / Full-time / October 2010 – Present

I was promoted from Junior Developer to Developer in October 2010 at Jellyfish. As well as the promotion, I was also transferred to the creative team (they were previously a partner company known as Creative Uncle). My role at this team involves heavily on front end development work.

My current role involves:

- Maintain existing websites
- Build new websites following technical specification and approved visuals. Majority of client websites are built using Concrete5 (CMS) and a small minority are built using other frameworks or no framework.
- Advice designers on the feasibility of their design

Junior Developer

Jellyfish (Paid search agency) / Full-time / October 2009 – September 2010

I joined Jellyfish Ltd (a PPC (pay per click) agency situated in Reigate, Surrey) in October 2009 as a Junior Developer. I worked among a team of other developers to build and maintain Jellyfish's in-house platforms & services (both back & front end). I was mainly involved in the front end of their main platform, and I work very closely with the business to provide an easy to use interface for the users. We use jQuery heavily in the front end of their platform.

I worked in an agile environment (using SCRUM). I took part in the whole SCRUM process regularly (i.e. planning, estimating, daily stand up and writing & tasking up user stories).

Freelance Web Developer

Source London Ltd / May 2009 – October 2009

I worked as a freelance web developer / PHP developer for Source London Ltd straight after university. Much of my work involved working with Wordpress, converting sites into Wordpress system and updating older WP sites with WP's new template system.

TECHNICAL SKILLS

Front-End Development

- XHTML to W3C Standards (advance knowledge)
- CSS to W3c Standards (advance knowledge)
- CSS3 (basic knowledge)
- JavaScript, JQuery Library & MooTools Framework (intermediate knowledge)
- Good knowledge of XML 1.0/2.0
- Basic understanding of SEO
- Good understand of accessibility guidelines (WCAG 2.0)
- Adobe Photoshop CS – CS5 (intermediate knowledge)
- Adobe Flash CS3/4 and ActionScript 3.0 (basic knowledge)

Back-End Development

- PHP 5 – object oriented (intermediate-advance knowledge)
- Good understanding of MVC
- Advance knowledge on CodeIgniter Framework
- Basic knowledge on Zend Framework
- MySQL 5 (intermediate knowledge)
- Wordpress, understanding the use of templates and knowledge of varies plugins (intermediate knowledge)
- Good understanding of Concrete 5 (CMS)
- PHPunit for unit test

Others

- Basic understanding of following programming languages: C/C++, JAVA
- Facebook Integration – FBML, fan page integration & like buttons (basic knowledge)
- Use of UML for design and planning (basic knowledge)
- Good knowledge of SCRUM development process
- Version control using SVN (command line and Tortoise SVN)
- Operating systems (Windows XP, Vista, 7 & Mac OS)

OTHER SKILLS

- Full UK driving license (automatic)
- Fluent is spoken and written English
- Fluent in spoken Cantonese. Can read & write some traditional Chinese

INTEREST & HOBBIES

- Photography – regularly experiment with Canon 500D
- Jewellery making
- Attend the gym regularly
- Watching Hong Kong dramas
- Social networking & blogging
- Enjoy gaming online (MMORPGs)
